

html2pdf

An auxiliary tool to increase the efficiency of mental work

Agenda

- html2pdf description
- The main challenges of the html2pdf development process
- Alternatives
- html2pdf MVP development process
- html2pdf Minimum Viable Product

html2pdf description

- A tool for converting web-based manuals and books to PDF for enabling full-text search
- An auxiliary tool for rapid processing of large amounts of information
- An intellectual tool that can significantly reduce the time spent searching for information in web-books and web-manuals

The main challenges of the **html2pdf** development process

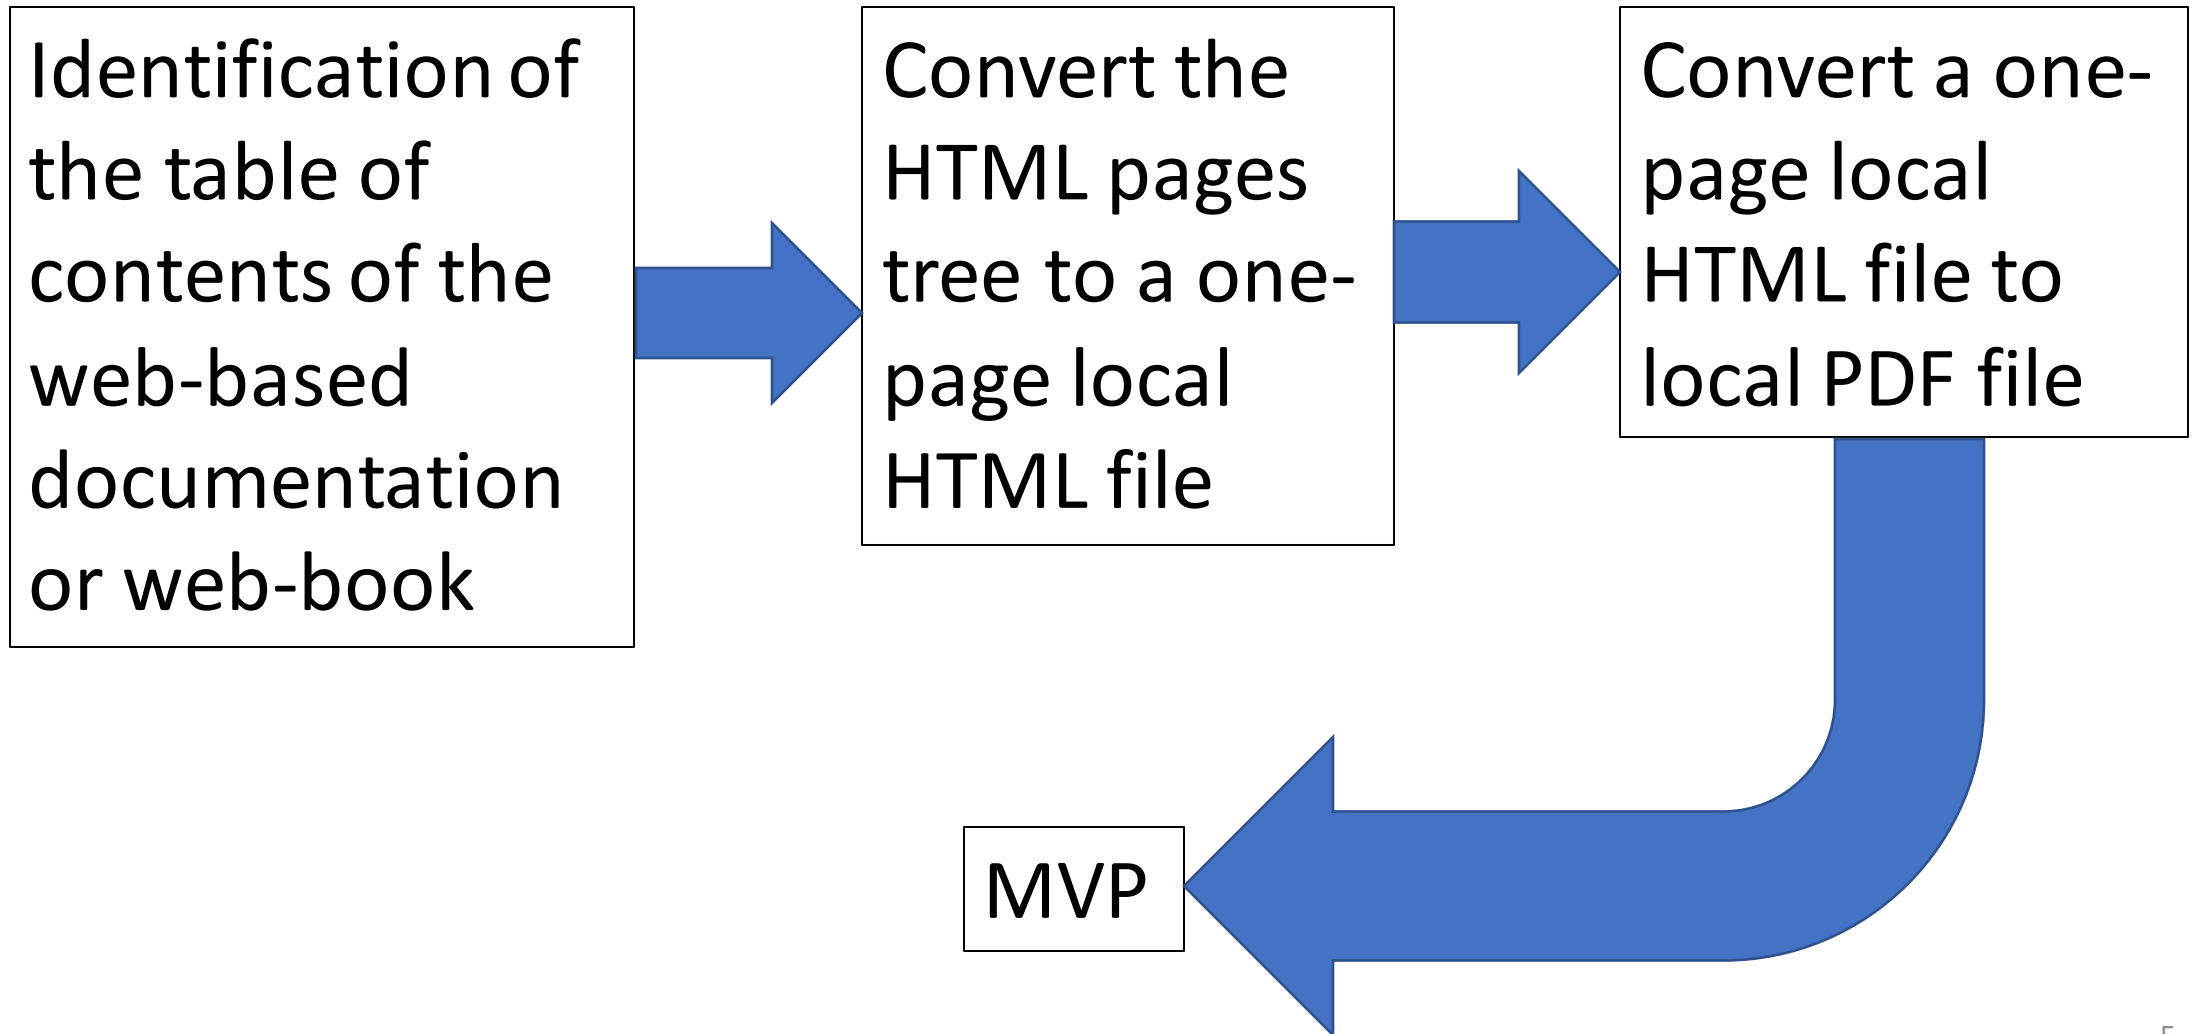

Keep the original
web-site's styling
when converted
to pdf

There are various
approaches to
organizing a table of
contents of web-
documentation

Saving
animation when
converting to
pdf

Web-bots and
spiders
protection

html2pdf development process

html2pdf Minimum Viable Product

- html2pdf is a console application
- html2pdf should get the table of contents from the <https://www.learncpp.com/> home page and put it into *learncpp.pdf*, where all positions of the content are links to the relevant pages of the site
